## **ARB MIDSTREAM ACQUIRES DENVER-BASED INCORR ENERGY GROUP LLC**

**Denver, CO, (January 13, 2015)** - ARB Midstream, LLC, a Denver, Colorado-based midstream logistics and marketing company, announced today that it has acquired InCorr Energy Group LLC, an established crude oil marketing and trading company also headquartered in Denver, Colorado.

InCorr, a privately held crude oil marketing and trading firm established in 2011, currently markets crude oil from producing regions throughout the inland corridor of the U.S. including the Bakken, Powder River Basin, Uinta, and DJ Basins. InCorr provides marketing, storage, and pipeline solutions to producers, refiners, and midstream companies. The entire InCorr commercial team will be retained by ARB Midstream and will oversee the regional commercial activities of the company.

“InCorr is a well-respected and talented crude oil marketing company with roots in the Rocky Mountains and MidCon markets. Joe (Purdy) and Mark (Wysocki), the Principals of InCorr, have a long history in the refining industry and understand crude sourcing and selection, which is extremely important in today’s market. With this acquisition, ARB has added a critical component to its team and continues its development into a full service, geographically diversified midstream infrastructure and logistics company,” said Adam Bedard, CEO of ARB Midstream.

“InCorr will continue to provide the high quality marketing and transportation services to producers, refiners, and midstream companies that they have been use to since InCorr was started five years ago. InCorr brings considerable experience in sourcing and supplying crude from the various producing regions throughout the middle of North America,” said Joe Purdy, co-founder and President of InCorr. “We are excited about this new partnership with ARB Midstream as it provides us with a broader platform to grow our business and to develop quality midstream assets.”

The acquisition of InCorr supports ARB Midstream’s strategic focus of developing and acquiring a portfolio of interrelated midstream assets throughout the middle of North America, and to market around those assets. ARB Midstream, LLC is funded by its equity member, BV Natural Resources, LLC.
